

AUTUMN/ WINTER 2024

LINCOLN UTC NEWS

PRINCIPALS FOREWARD

When one door closes...

Since joining Lincoln UTC in January 2016, the school has changed in a remarkably positive way. We won't ever apologise for the high standards expected from all our students. We have exceptional behaviour, attendance and punctuality and an insistence on good manners, tolerance and honesty. These, in my opinion, are the foundations for a positive future, opening doors for us all.

For our new cohort of students in year 10, a door has closed on their previous experiences at school and a new door has opened, one that will provide challenge and success in abundance. For students in year 12, the door is opening to develop skills that make them stand out from the professional crowd that they will be competing with, throughout life.

I am proud to reflect on the past 8 ½ years at the UTC in my position as Vice Principal, so many doors have been opened for young people that have had the motivation and determination to succeed.

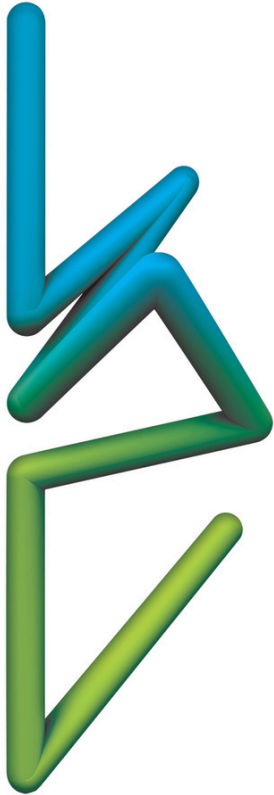

Many of our alumni return to the UTC and talk about the 'little things' that made the difference to them as they progressed to either university, employment or into an apprenticeship. It's this attention to detail that matters. it makes the difference between that proverbial door opening, or not!

A new door opened for me in September as I stepped into the role of Principal. I look forward to the next few years and I am excited to be able to positively impact on so many young people who choose to attend the UTC. We will continue to open doors to bright futures for all the young people who share our steadfast determination.

Year 10 / 12 students: I hope that your decision to join the UTC has proven to be the right one, and you are enjoying the courses that you have chosen, as well as your time at the UTC. Year 11 / 13 students: Don't lose sight of the finish line, it's not far away and it will creep up on us quickly! Work hard play hard... enjoy the journey!

I look forward to sharing the news from our recent Ofsted inspection very early next year.
Have a great, and well earned, Christmas break.

Stuart Hamer, Principal

GCSE RESULTS

With Ofqual suggesting that GCSE grade boundaries were to remain similar to last year, there were some concerns being raised that there may be a widening of the disadvantaged gap. However, we are pleased to say that at Lincoln UTC, no such 'gap' existed. Our students performed remarkably well with over half of our results graded at 5 or above... disadvantaged or not!

Our top two students were clearly unaware that a grade 9 was difficult to achieve. Between them they amassed ten grade 9s, two grade 8s, one grade 7, two D*s, and two Ds (Distinction).

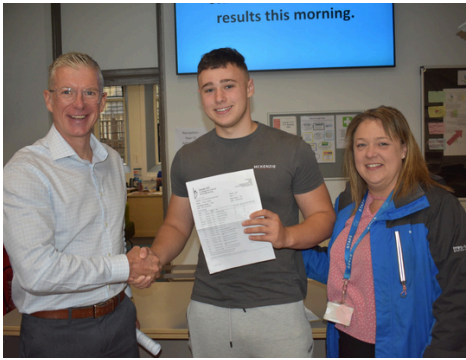

Szymon Gajewski's mum said: "I am so proud of Szymon. The staff at the UTC have been such a great support and we are really happy we made the move to the UTC."
GRADES: 9,9,9,9,9,8,8,8,D*,D*

Fletcher Pomfret's mum said: "We decided to move Fletcher from his other school due to the smaller class sizes at Lincoln UTC. He has done so well, and we are really proud of his achievements. We are grateful for the support he's received at Lincoln UTC."
GRADES: 9,9,9,8,8,8,7,D*,D,D

Our pass rates (grades 4 – 9) for English and maths are 79% and 86% respectively. For grades 5 – 9 they are 64% and 67%. These achievements are significantly above last year's national figures, and we expect to be ahead of national standards again this year.

Our successes don't simply appear at the top of the grade rankings either. We have a number of students who performed particularly well, with their progress 8 score approaching 2.0 (achieving 2 grades above their national targets).

Andrew Ogg, member of the Governing Body at Lincoln UTC said: "Our students work with passion and enthusiasm at Lincoln UTC. It is a privilege to see every time I visit the school. They will be delighted with their results, as they should be. Many of our students will return to us in year 12 to continue their studies, and we look forward to seeing them back with us in September. We also look forward to welcoming many new students who have chosen to join the UTC in our excellent sixth form."

REMEMBRANCE DAY

Lincoln UTCs' sea and air cadets all came together for a heartfelt Remembrance Assembly, paying tribute to the brave men and women who have served our nation.

The students involved talked about the relevance and history of the poppy and lead a two minutes silence for the students in attendance.

Many of our students choose to be part of the sea and air cadets and hope to pursue a career within the forces. Our close connection with the army and RAF careers service means our students get to create links with the forces as early as year 10.

A LEVEL/ TECHNICAL RESULTS

The majority of Lincoln UTC students achieved A* - C grades this year, but in line with Ofqual's confirmation that they are continuing with normal grading (in line with 2019 – pre pandemic), we expected to see a reduction of our highest grades. Despite this, we saw an increase, with 34% of grades falling into the A* - B grade boundary.

A particular congratulations must go to Eli Pang and Moishe Pang who joined us at the start of year 12 to study A-Level mathematics, physics, chemistry and biology. This morning it was an absolute treat to watch them open their results. They achieved eight A* grades between them and will go on to study at The University of Glasgow where Moishe will study electronic and electrical engineering and Eli will study Medicine.

Hayden Smithett, year 13 student, said: "I've been at the UTC since year 10. The sciences I have studied are all taught individually and by specialists, this has been so helpful to me." Hayden now looks forward to studying physics with astrophysics at York University. (Grades AAAC)

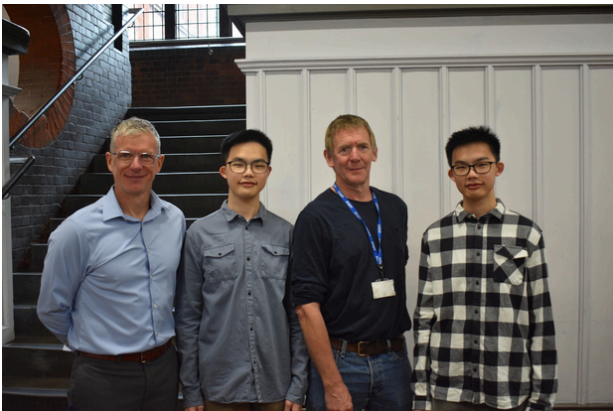

Dylan Church, year 13 student, said: "Lincoln UTC is a completely unique learning environment, there is nowhere else that can provide a learning experience like I've had." Dylan will be studying architecture at Kingston University next year. (Grades AACC)
Approximately one third of our sixth form students opt to study engineering, one of our specialisms. Students choose to study a triple A-Level 'equivalent' BTEC qualification or complete a T-Level in Engineering.

Once again, our BTEC Engineers have performed well, with 100% of students accessing at least merit grades, 63% accessing distinction grades, and 21% of students accessing distinction* grades.

2024 is the first year in which students have left Lincoln UTC with a T-Level qualification. It has been fascinating to watch our students grow in confidence and resilience as they put their skills to use in an industrial setting. Their ability to make sense of new equipment, and problem solve in the workplace, has been commented on favourably by our employer partners.

A number of students have gained apprenticeships with their T-Level placement provider, as well as one of our students, Oliwia Bober, progressing onto a Nuclear Engineering Degree Apprenticeship (Level 6) with Rolls Royce. Oliwia's mum said: "The opportunity Oliwia has had at the UTC with the T Level and work experience placements has been great. It has ended up with her gaining a fantastic degree level apprenticeship."

Paul Birt, member of the Board of Trustees at Lincoln UTC said: "The students have worked extremely hard over the course of their time at Lincoln UTC and have now reaped their rewards with great results. Well done!"

LEADING THE WAY IN CAREER GUIDANCE

We are delighted to have retained the national Quality in Careers Standard Gold Award.

Lincoln UTC does a fantastic job helping each student navigate towards their future career. Since the last review, the school has upped its game, building on an already impressive career guidance programme. Students are motivated with planning their careers, discussing their future paths, and taking solid steps toward their goals.

We offer a mix of career-focused classes, meetings with potential employers, and chances to experience real work environments. Our students find these opportunities super helpful as they build skills and figure out what they want to do after school.

The teachers and staff at Lincoln UTC are key players in this success. They're supportive and keen to help students succeed, which creates a positive vibe around the school. Students feel encouraged to explore different careers and think about what might suit them best.

All in all, the school is making a big difference in helping students feel ready and excited about their future careers. With such a strong support system, students at Lincoln UTC are well on their way to understanding their options and building a bright future.

YEAR 10 VERTIKAL DAYS

Our students were selected as the only school to attend the fantastic Vertikal crane day which is sponsored by Liebherr. The students spent the day undertaking various challenges and working alongside the sponsors.

The organisers of the student day 'My future choice' have invited Lincoln UTC back again next year to take part with our next cohort. They had this to say about our students 'Vertikal Days' experience.

Liebherr were impressed with our students and had this to say-

"We are still singing praises of the College students. One thing that really struck me was the emphasis you had placed on arts creativity team challenges to create the ethos and attitude".

NEW PROJECT LAUNCH

This year we have several new exciting projects on the timetable. After speaking to lots of engineering companies over the course of last year it was identified by some that a skills gap within the next generation of engineers is a good understanding of hydraulics and pneumatics.

With this in mind we have developed a new projects course to help solve this skills gap. The students begin in week one by learning the basics of hydraulics/pneumatics with a little theory, then they build a pre-supplied kit to get a feel for the theory they've learnt about working in action. Over the duration of the project the students use their own design skills, ideas and then manufacturing skills to make a functioning hydraulic machine of their own.

Working with the theory of hydraulics, using their maths skills to work out the necessary forces and angles, and their imagination will culminate in week 4 with their own finished creation that has a practical purpose!

WOMEN ARE THE FUTURE IN ENGINEERING

Lincoln UTC female science, engineering and technology students last week worked with Network Rail to tackle stereotyping and look ahead to future careers.

The Baker Dearing Educational Trust and Network Rail organised Shaping the future: empowering young women and non-binary leaders in industry in Doncaster on Wednesday 27 November for University Technical College students.

Over 80 students from eight UTC schools across England attended the pioneering event and engaged with a packed agenda of talks and activities.

In a keynote speech, Baker Dearing's deputy chief executive Kate Ambrosi, who in January will become the trust's first female chief executive, encouraged the students to put themselves forward, saying: "Be impressive in interviews, because you are impressive."

An inspiring day for our future engineers!

CONSTRUCT 3D

Lincoln UTC alumni Jacob Lord and his mum, Thérèse Lord, presented at our business lunch in October. The family duo launched their exciting business off the back of Jacobs work during covid where he was busy 3D printing parts for face visors.

Since then they have launched a successful company Construct3D which produces the fastest 3D printers in the UK and one of the fastest in the world!

You can find out more about them on their website <https://construct-3d.com/>

GREENPOWER GOODWOOD FINAL

A race review from our Greenpower team who attended the Goodwood final...

Race 1 for F24 started off great and the car was performing well, until lap 3 when a driver cut up the car and forced us onto the grass! Conrad recovered well and continued racing but unbeknown to us there was now a problem with the car, as a result of our encounter with the grass. The batteries died off before the end of the race leaving us with 13 laps (approx. 31miles).

The car had to go out again for F24+ with the same issues and batteries died even sooner with a faster gear ratio leaving us in 19th position in our category. This time when the car came in it was obvious where the problem was.

The front left wheel had been knocked out of alignment and the tyre had worn down to the canvas as it was dragging sideways! The car was quickly fixed and a new tyre was put on ready for the 2nd F24 race.

Our first driver reported that the car was running perfectly! Disaster struck again however, just after our first pit stop a car from another school rolled on a corner and the red flag came out. Our driver waited 20 minutes for the race to restart but at this point it was too late to re-gain the lost time and miles.

When the overall results came in we finished 22nd in our category for F24 and 19th in our category for F24+

The team did however win trophies and awards for the Royals Navy's fastest kit car for F24 & F24+ and all of our Greenpower team came away with a Gold Industrial Cadet award which will be a great addition to their CV.

Well done to everyone involved!

NETBALL STAR

Congratulations to Lincoln UTC student, Neave Latarche, who has made the Nottingham Forest National Performance Squad for netball.

Neave will be playing up in age for the Under 19s which is a huge achievement. Neave said 'I'm eager to get started. I'm looking forward to working hard, developing my game and continue becoming a stronger player for both Nottingham Forest U19s and Hull KR Netball.

GREATER LINCOLNSHIRE LEP CONFERENCE 2024

The year 12 business studies students had an inspiring time at the Greater Lincolnshire LEP Conference 2024.

Keynote speaker, Brett St Clair, who is known as a rebel technologist spoke all about artificial intelligence and how the future will look. Our students came away with lots of food for thought!

Oliwia Bober - T Level Engineering Student

Which employers did you work with and what did they specialise in?

I completed my placement at ITP Aero, an aeronautical company which contributes to the design, development and manufacturing of aeronautical components for both commercial and defence aviation. During the placement I became part of the manufacturing engineering team. While being part of the team I learned how to use numerous different software programs and gained an understanding of original engineering drawings.

How was Lincoln UTC pivotal in your success with your T Level?

Attending the UTC allowed me to be able to expand my hard and soft skills, by regularly working as a team, encouraging critical thinking and problem solving both in the classroom and the workshop. With my course being a T-Level, I completed weekly placements with an engineering company chosen by the UTC based on my future career aspirations. The UTC and my placement provided me with a clear perspective of the frequently faced problems and the methods taken to solve and prevent them in the future.

What employer will you be progressing to?

Following my studies at Lincoln UTC, I will be starting a degree apprenticeship in Nuclear Engineering at Rolls Royce.

To find out more about the T Level please visit our website www.lincolnutc.co.uk/the-academic-curriculum/engineering

COMPUTACENTER

UTC is really excited about our collaboration with Computacenter. We invited Richard Bloxam-Rose to demonstrate cybersecurity training and ways to protect data systems from hacking, during a two-hour Computer Science session.

As a college, we are passionate about developing the skills of our students, and the importance of computer science skills alongside this. Raising awareness of the kinds of skills needed within this industry is a big debate at the moment, and was recently brought up at The House of Lords by one of our founders, Lord Baker.

Lincoln UTC are looking at this closely and will be working with Computacenter in partnership, to help facilitate some interesting collaborations in the new year.

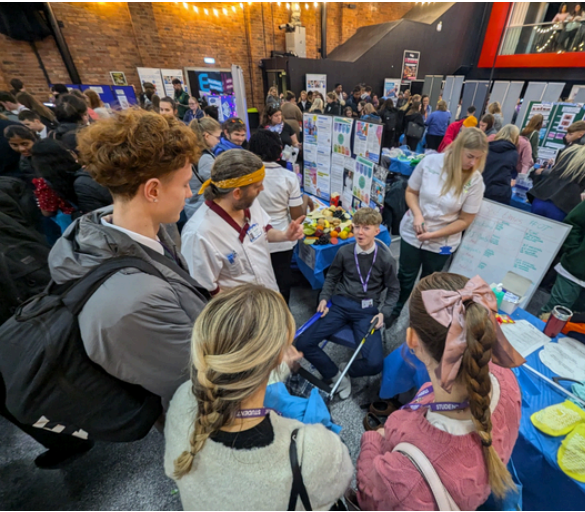

NHS CAREERS

Our students had an inspiring day at the NHS Careers and Talent Fair on Wednesday 13th November.

Hosted by the Lincolnshire Talent Academy, our 40 students from Years 10-13 discovered the vast array of career opportunities within the Health & Care sector.

From Nursing and Medicine to Engineering, Catering, and IT, the fair had it all. Our students dived into hands-on workshops, including CPR techniques, phlebotomy on prosthetic arms, and even keyhole surgery at the University of Lincoln's clinical simulation suites.

ANGLIAN WATER

Anglian Water for presenting to our students at our weekly business lunch.

The students enjoyed learning about the complex topics such as water conservation, treatment processes and sustainability. The presentation also highlighted the importance of preserving water resources and introduced career opportunities within the water industry.

The students came away with a deeper understanding of the environmental impact of water usage and its inspired them to think more critically about their own habits and community solutions.

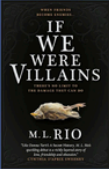

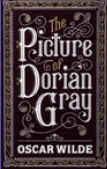

UTC GoodReads
IMMERSE YOURSELF IN
THE WORLD OF BOOKS

UTC Good Reads

Set up by a team of students who are passionate about reading.
Our goal is to share our book recommendations and reviews with you, and inspire you to read more.

CAREERS FAIR 2024

Our first careers fair in September was a huge success. The students engaged with over 30 fantastic universities and businesses who spent time discussing available options after leaving Lincoln UTC.

The event was open to all our year groups right from year 10 as we believe careers education should start as early as possible.

Some of the businesses who attended such as Gelders, NHS, WSP and Housham sprayers were really impressed with the calibre of our students and are looking forward to continuing their work with us.

A big thank you to everyone who visited our event, we look forward to the next one!

ONE TO WATCH!

Lincoln UTC student, Max Fenton, continues to rise to the top of British racing! Getting to the final of the British racing sports car club, he made it into the top 3 out of 60. Max has lots more exciting opportunities ahead of him and has even had media training to prepare him for what's to come.

Max has started work on building his new race car and will getting out on the track again in the new year.

MASTENBROEK VISIT

The Year 12 engineering students had a trip out to visit Mastenbroek in Boston for National Manufacturing Day.

The engineering students got the opportunity to look at the principles of electro hydraulics, before heading to the design office to see a CT12 in build, together with a Bulldog 17/17 rock trencher destined for California! Thanks for having us Mastenbroek!

Thanks for having us Mastenbroek!

CHARITY WORK

We have continued our charity work this year, so far raising money for Young Minds (£330.10), raising awareness for Movember and men's mental health, and have been collecting for the community larder throughout December.

Next year we will be raising funds for Mrs Taylor who is running the London Marathon on behalf on Lincolnshire and Nottinghamshire Air Ambulance Charity.

We are also holding a sleep over where we aim to raise funds and awareness for homelessness, working alongside project compass.

Thank you to everyone who has contributed to these charity initiatives.

EXAM INFORMATION

GCSE/ A level certificates are now available to collect from reception.
Year 11 mocks are week commencing 3rd March 2025
Year 13 mocks are week commencing 10th March 2025
Please see Mrs Fox for further information on exams.

WORK EXPERIENCE

Year 10 work experience will take place on Monday 7th June 2025
Please see Mr James for further information.

HONG KONG 2024

In July we welcomed our visitors from VTC Hong Kong for a ten-day visit. The VTC students had a programme of activities including industry visits, university visits as well as a trip to York.

Our return trip to Hong Kong took place in October with Mr Chung and Mrs Taylor leading the trip. The students spent 10 exciting days exploring Hong Kong and learning at The VTC with the students who visited us.

The Hong Kong exchange is an annual event open to all students but with limited places. In order to secure a place on the trip students present an idea to to an audience (staff and governors) on someone or something within the fields of science and engineering that has inspired them.

We look forward to continuing our exchange with Hong Kong VTC and welcoming them all back in 2025.

UTC FISHING COMPETITION

Our first UTC fishing competition was a success!

The draw for the pegs took place with Roger, the bailiff, at Hanworth Country Park at 1100... 'all in' at 1245.

Harry (yr11) was bigging himself up with plenty of confidence in front of his competition for the afternoon... 'don't worry lads, I've got this!'

Ryan (y10) got off to a flying start with a couple of small silvers. Soon after this however Mr H and Marley (y10) hooked into FIs and some small carp.

Mr D and Harry were unfortunately a little frustrated with the lack of fish in their pegs... or their inability to persuade them to BITE.

After 5 hours the results looked like:

1st	Marley	15lbs 2oz
2nd	Mr Hamer	12lbs 9oz
3rd	Ryan	6lbs 7oz
4th	Euan	4lbs 3oz
5th	Harry / Mr Davis	Zero / Nowt / 'O' / Last place!!

Ryan and Euan won a £10 gift voucher for Fishing Republic. Marley won the overall top spot with a £10 voucher too, and a new Preston Innovation lading net. Well done to all!!!

Look out for the next fishing competition back at Hanworth Lakes in July 2025!

WHATS ON 2025

Lincoln UTCs busy careers programme continues into 2025. To book onto activities you will need to go through google classroom. A reminder of your class codes is below.

Year 10 -ykwmn2u
Year 11 - dombfij
Year 12 - mzdj2m3
Year 13 - njagzv2

The upcoming events in the first half term are listed below. If you require any further information then please see Mrs Hickling.

Alternatives to Medicine - Bio Day

Friday 10 January
Workshops - Biology, Biochemistry, Bio veterinary Science and Biomedical Engineering

Delve into the world of Life Sciences and look beyond medicine and healthcare into the subjects that fuel our understandings of disease, drug development, and the latest advances in biomedical engineering.

Business - De la Haye Airlines

Wednesday 22 January
Workshops - International Tourism Management, Marketing, Management

Using the case study of our fictional company, De La Haye Airlines, students will engage in sessions in Management, Marketing and Tourism to examine how the airline was able to pivot from being a passenger airline pre-pandemic to carrying medical supplies, vaccines and transport key workers before returning to its traditional business model. This however has caused issues for the airline which students will get to examine and provide their solutions to during the day.

Ag-Careers Event - Tuesday 4th February 2025, Lincolnshire Showground

We are delighted to invite you and your students to our annual Ag-Careers Event. Take advantage of this free opportunity for you to delve into the exciting world of agriculture, horticulture, and the food sector, including the diverse and progressive careers available in such a broad industry.

The event encompasses a variety of opportunities to network and develop knowledge through our:

- Interactive exhibition village
- Keynote speakers
- Variety of workshops

Design - 3

Wednesday 12 February
Workshops - Photography, Creative Advertising, Graphic Design

This is your chance to engage with some of the most creative programmes here at the University of Lincoln. Through three highly engaging and interactive workshops you'll have the opportunity to think about how some of the most creative products and promotional campaigns are put together.

Mental Health

Wednesday 26 February
Workshops - Psychology with Mental Health, Nursing, Health & Social Care, Social Work

Good mental health and wellbeing is vital for us all. This event will showcase our range of mental health-related courses that could develop mental health leaders of the future. These courses include Psychology with Mental Health, Health and Social Care, Social Work and Nursing with Mental Health.

Business - Responsible Management

Wednesday 26 February
Workshops - Business & Management, Governance, Law

Responsible Management sits at the core of how businesses should behave; legally, morally and ethically. Through 3 workshops we'll look at different aspects of management and the impact that it has on the organisation and its employees using case studies which students will have seen in the news such as the Post Office Scandal and P&O Ferries.

Law - Students will look at a business that has fallen on hard times. Profits are down, work is drying up, but the employees still need to be paid. What options in law does the business have to navigate through these difficult times? Together we will explore some solutions.

Governance - Why the Post Office Scandal is a Governance issue.

Management - Using the case study of P&O Ferries we'll be looking at employment practices and how organisations treat their staff.
