Abyaan Khan - design

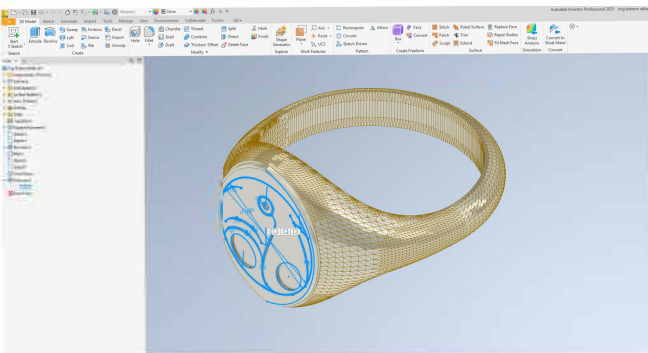

design 1

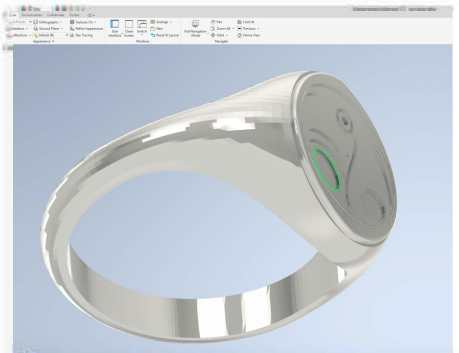

design 2

My design is based off of my favourite game - Hollow Knight. This design is based off of the Void heart - one of the final charms in the game. The design on the left was my first design, based more closely on the void heart. However, the parts on top of the design felt odd to me. I then decided to remove the top part entirely. This makes the design more simplistic, whilst also keeping the theme of what I wanted. I also added some other details, resulting in a more accurate drawing of the ring. My other two designs are based off of my name and family.
